

EUFA⁺L^oDA 33rd AGM

08th of May 2024

MIAMI FLORIDA

EU⁺FALDA

Board Activities

- EASA
- BOEING
- Flight Dispatcher Days at Eurocontrol
- Board Meeting AMS

EASA

- Several meetings within the federation to set up a team to comment on RMT.0392 Training standards for flight operation personnel
- Draft Document of 100 pages
- Sections were divided for associations

EASA

- Focus on training with CBTA
- EASA intends to wipe out familiarization flights, because the business jet carriers see a problem with that. Compromise?
- Last meeting in April 2024 was cancelled
- Awaiting new schedule
- Nomination RMT.0739 eMCO

Boeing⁺

- Meeting on 15th of November 2023
- Dispatch Insight project by the Boeing Digital Aviation Solutions (BDAS) Research team
- Dispatch insight project with workflow efficiency engine and AI powered data and analytics

Boeing⁺

- Everybody is invited to participate in a survey
- https://boeingcx.az1.qualtrics.com/jfe/preview/previewId/9d2439fd-daea-4e44-91f5-1fdcabf73905/SV_5vHfyvRVqO3dRVs?Q_CHL=preview&Q_SurveyVersionID=current

An innovative new idea under development...

Dispatch Insight

What if?

...your dispatcher could more easily and effectively anticipate and minimize the impact of disruptions in flight planning?

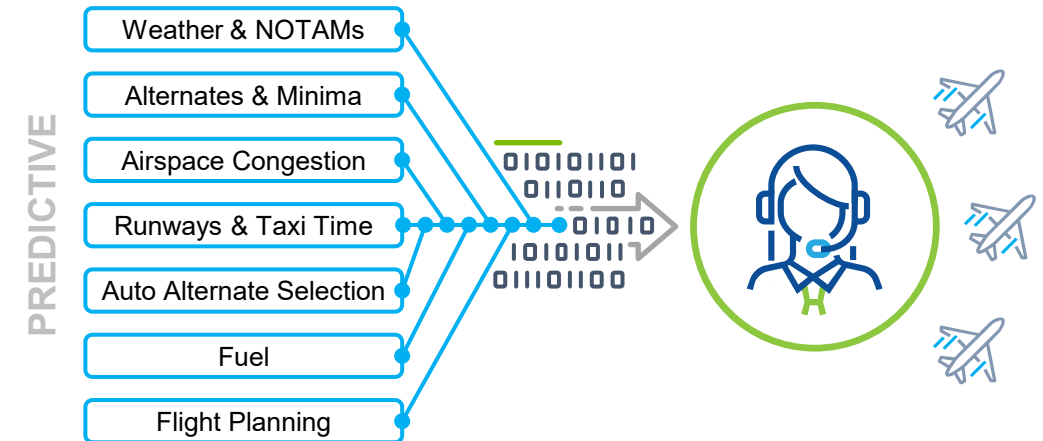

Dispatch Insight will improve **situational awareness** by integrating essential **preflight** information into a single user-friendly interface. Dispatchers benefit significantly from real-time *and* predictive information about weather, airport and airspace congestion, fuel availability, NOTAMs, and more. Intended to work beside your existing flight planning system, Dispatch Insight will **modernize** your dispatch process by integrating **predictive data** and **advanced algorithms** to provide mission critical **insights** allowing you to **minimize schedule disruptions**.

WHO IS DISPATCH INSIGHT FOR?

- Flight Dispatchers
- Pilots
- Flight Operations Managers

OPPORTUNITIES

- Dispatchers can better anticipate flight disruptions in advance
- Configure the data you need on a customized view
- Expand situational awareness with advanced prediction algorithms
- Insights don't require information from other Ops Center systems
- Can be used alone or paired with Boeing Fleet Insight
- Ideal for operators of all sizes

PLANNED CAPABILITIES

- Aggregate flight planning data sources in one view
- Deliver predictive data streams powered by AI/ML
- Integrate with flight planning solutions
- Push alerts if new data impacts published flight plans
- Suggest alternative flight plan inputs
- Track status of assigned flights

An innovative new idea under development...
